THE COMPANY

PERFORMANCE IN LIGHTING is an international Group that includes **four luminaire manufacturing companies**, two of which are situated in Italy, in Verona and Bergamo, one in Belgium, in Brussels, and one in Germany, in Goslar.

The Group converges professional expertise, technical know-how and experience in different lighting areas, **providing a complete range of luminaires and lighting engineering solutions** to designers and specifiers.

MISSION

To offer luminaires with great design, ensuring an everlasting quality, safety and durability: this is PERFORMANCE IN LIGHTING's mission. The different manufacturing companies now offer the best of updated technology thanks to the unique interaction of professionals and their vast specific know-how. The priority stays with products of high technological contents combined with proven functionality.

THE COMPANY'S HISTORY

Forty years on the international markets and a series of successes have developed and enriched the know-how of PERFORMANCE IN LIGHTING. Today it can look forward from a solid base of professional achievements that put PERFORMANCE IN LIGHTING among the leading companies in the global market.

1978

Establishment of PRISMA

1983

PRISMA starts to participate to the most important trade fairs in Milan, Paris and Hannover with a catalogue ever wider.

1993

Establishment of the French subsidiary company PRISMA Eclairage in Paris (now PIL France).

1996

Prisma is granted the ISO 9001 certification.

Certification of PRISMA's laboratory by other Certifying bodies such as UL / GOST-R / SASO / IRAM.

1999

Establishment of PRISMA North America in Atlanta (today PIL US).

2002

Establishment of the Operating Holding Company PERFORMANCE IN LIGHTING.

Acquisition of PRISMA PROGETTI (SICME).

PRISMA hits the barrier of 2.000.000 units sold.

New plant with new R&D facilities, mechanical / technical laboratory, photometric laboratory.

Opening of the company's kindergarten "Nidoblù".

2003

Acquisition of SBP S.p.A. and its French subsidiary SBP France.

2004

Establishment of PIL Nederland in Amsterdam.

Establishment of PIL Spain in Barcelona.

Establishment of PIL Portugal in Rio Tinto.

2006

Establishment of PIL Australia in Melbourne.

Establishment of PIL UK in Birmingham.

2009

Acquisition of ED-DIS in Brussels (now PIL BE).

2010

Acquisition of SPITTLER GmbH in Goslar (Germany) and its subsidiary company SPITTLER Finland.

2013

Establishment of PIL MIDDLE EAST in Dubai and PIL SINGAPORE.

2017

Celebration of 40th anniversary of activity in the lighting sector.

APPLICATION AREAS

Each lighting application area has its proper specific needs. PERFORMANCE IN LIGHTING runs the width of its product range **via eight application areas that cover the main lighting applications through an in-depth analysis of its proper lighting solutions.**

R&D | DESIGN | PLANNING

PERFORMANCE IN LIGHTING gathers productive know-how and experience in strategic sectors as research, development and marketing. Product design and planning is done with the support of an internal team of highly qualified technicians using the most sophisticated CAD programs, compatible with all production phases. The design of the components for the finished luminaires is monitored down to the smallest detail of construction, and 3D simulation allows in house designers to evaluate the essential qualities of the finished product before starting mass production. **All products are completely designed in Italy, Germany and Belgium.**

QUALITY | TESTS | CERTIFICATIONS

All lighting products must comply with the Norms and Standards that govern safety, quality and durability. Therefore PERFORMANCE IN LIGHTING has invested in own laboratories and operates a quality system that complies with the **ISO 17025 standard**; the laboratories have been awarded the CTF STAGE 2 (Customers' Testing Facilities - Stage 2) by IMQ (Istituto Marchio Qualità/Italian Quality Brand Institute) compulsory to obtain the **ENEC 03 certificate**. The same laboratories have been qualified to carry out tests complying with UL standards. PERFORMANCE IN LIGHTING today has 3 laboratories for endurance and durability tests and two own photometric laboratories.

PERFORMANCE IN LIGHTING is certified by a quality system that complies with the **ISO 9001- 2008 standard for the whole production cycle**, the logistics and the marketing activities of its products.

In 2012 PERFORMANCE IN LIGHTING is the first company in its branch to provide a **5 year warranty on all its products**.

LIGHTING DESIGN AND PLANNING

A team of experienced lighting engineers ensures that **the lighting design and any other professional support provided brings the best possible answer to the client's and contractor's wishes for architectural projects**. The Group publishes through its own laboratories certificates and photometric data of each single product. Only the real consumption and outputs of each product code are published and communicated (CLEAR CONDITIONS directive).

THE ENVIRONMENT | SUSTAINABILITY

Respect for and focus on the environment accompany product design and development operations. The optimization of production cycles, supplying of raw materials, selection of recyclable materials for production, logistics and marketing are all professionally managed. From the early stages of planning attention is given to the recycling or reuse of the materials up to 98%.

From 2004 PERFORMANCE IN LIGHTING is a **founding member of the Consortium ECOLIGHT – n. 0029** (for the recycling of lighting devices, RAEE).

The conscious and optimized management of energy is tangible in the low environmental impact installations of its production plants. From 2013 PERFORMANCE IN LIGHTING **independently produces more than 50% of its own energy requirements** by photovoltaic installations.

SUBSIDIARY COMPANIES

To meet the customer's needs, PERFORMANCE IN LIGHTING has over the years established a vast and structured commercial network through subsidiary companies or distributors. After the domestic and european commercial organization, **the Group now exports to more than 100 countries worldwide.**

DIVINE THE DIVINE OR

ALLE ORIGINI DEL DIVINO

Nella Storia dedicata al profumo, un capitolo importante riguarda il divino e le sue origini. La mostra parte dall'Antico Egitto, dove è nata la scienza profumiera. I primi vasi per profumi risalgono infatti alle epoche pre-dinastiche (4000 anni avanti Cristo). I sacerdoti sono i primi profumieri e preparano unguenti e oli profumati per offrirli agli dei. Successivamente il profumo non ha più carattere sacro e inizia a svolgere un ruolo essenziale nella vita quotidiana.

In the history of perfume, the chapter on the divine and its origins is of vital importance. The starting point of the story, which is told in this exhibition, is the heart of ancient Egypt, the birth place of the science of perfumery. The first perfume vases date from predynastic times (4,000 BC). Priests were the first perfumers and prepared unguents and fragrant oils as offerings to the gods. The use of perfume soon expanded from a purely sacred use to a practical one that began to play an essential role in daily life.
